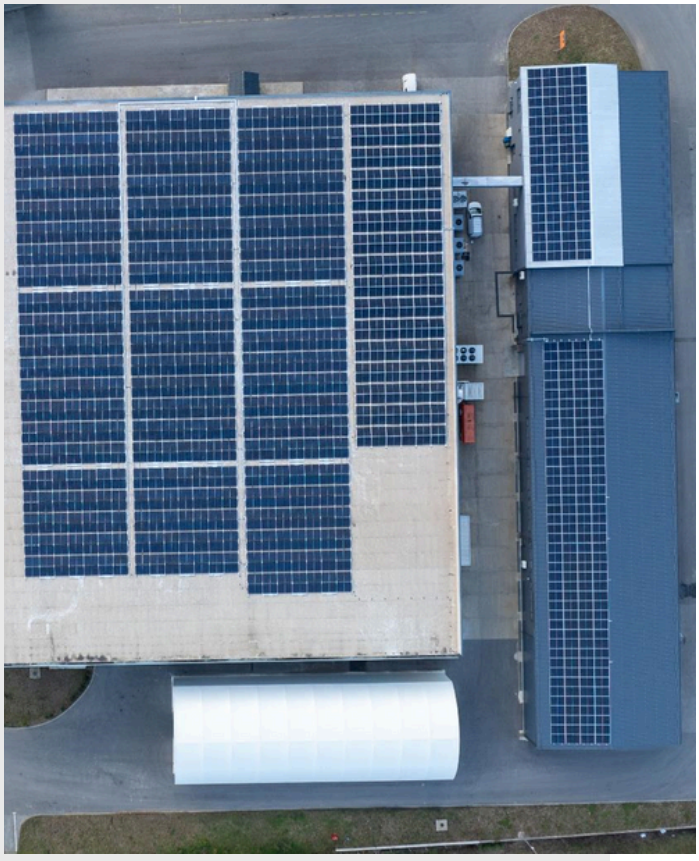
Solar Plant

We've taken a huge step forward in our sustainability journey by integrating solar panels across our production facilities as a part of our strategy to reduce our carbon footprint and shift towards renewable energy sources

Total power capacity: 558 kWp
Inverters capacity: 450 kWp
Projected production/year: 615 MWh

The environmental benefits:


- equivalent to 420 planted trees
- 289.05 t of CO2 reduced
- 246 t of coal saved per year
